① Choose your target road here.

② Choose a date you are interested to know how the road performs on this date.

③ Choose a road performance which you want to see if the road meets the maintenance requirement regarding this performance indicator.

④ Choose a performance model that is used to predict the road maintenance needs.

⑤ Run the software. It will take seconds to give the results.

⑥ The user's settings show up here.

⑦ The partial results of the software show up here. RESULT_Decision Tree.png and RESULT_Report.xlsx show the complete results.
